

## Questions

### In JASigning:

- How to apply non-manual features to multiple signs?
- How to synchronize the manual activity of a sign and the corresponding mouthing?
- How to introduce a “stamping” movement with successive identical fingerspelled letters?
- ...

# Solutions

```

<mouth name="LER" amount="0.34" timing="x m t m s l x"/>
<morph name="picture picture="large" size="small" />
<nomotical_sign>
</nomotical_sign>
<hamgestural_sign>
</hamgestural_sign>
<extra_movement sign="SEN" speed="1.2"/>
<morph name="HTRR" amount="0.2" timing="m t 2"/>
<morph name="HTRR" amount="-0.2" timing="m t - f t"/>
<morph name="HTRR" amount="0.2" timing="m t - f t"/>
<morph name="HTRR" amount="-0.2" timing="m t - f t"/>
</extra_movement>
<hamgestural_sign>
<directedmovement>

```
